

GENIE

Google Gemini Powered Learning Assistant

Brainstorming & Ideation Phase

Generating and refining the idea for Genie

Project Phase Documentation

This document covers the activities, outputs, and considerations for this phase of the Genie project.

1. Understanding the Problem

Genie – Brainstorming & Ideation Phase

- Students often need quick explanations, summaries, examples, and guidance while learning.
- Traditional learning resources may require searching through multiple websites, books, or videos.
- The project idea is to create a single learning assistant that can respond to student questions in a simple and useful way.
- Genie uses Google Gemini as the AI foundation to support interactive learning.

Aspect	Details
Purpose	Generating and refining the idea for Genie
Project	Genie: Google Gemini Powered Learning Assistant
Technology	Python + Google Gemini integration
Target Users	Students / learners

2. Idea Generation

Genie – Brainstorming & Ideation Phase

- Create an AI-powered learning assistant for students.
- Allow users to ask questions using natural language.
- Provide explanations according to the learner's question.
- Support activities such as summarization, concept explanation, question answering, and study assistance.
- Keep the interaction simple so that students can focus on learning rather than searching.

Key Note: The exact implementation can be adjusted based on the final project code and available Gemini API configuration.

3. Selected Idea & Expected Outcome

Genie – Brainstorming & Ideation Phase

- The selected idea is Genie: Google Gemini Powered Learning Assistant.
- The system is designed as an interactive educational assistant rather than a static information page.
- Google Gemini is considered for natural-language understanding and response generation.
- Expected outcome: a user-friendly assistant that helps students understand academic topics and access learning support efficiently.

Phase Output: A clear, reviewable result that can be carried forward to the next project phase.
